

## **Schools and ELC/childcare Asymptomatic Testing Programme Parent/Guardian Information Note**

Testing and self-isolating can help limit the likelihood of the virus getting into schools/settings, and help mitigate the impacts if/when it does. **Specifically, please continue to support and encourage your child to continue testing and ensure that:**

- **all test results, whether positive, negative or void, are reported using the digital portal or telephone service (119).** Reporting test results can be done from mobiles, online or by phone, and should be completed straightaway. Reporting not only supports contact tracing in the event of a positive case, but assists our collective understanding of rates of infection in communities and schools/settings across the country. If we only record positive results, the level of COVID-19 cases may look worse than they really are. Collectively, health professionals can use the information to spot patterns and outbreaks more quickly and accurately, and ensure better targeting of responsive and preventative action; helping reduce the risk of future lockdowns;
- **if they have a positive LFD result, they, and anyone else who lives in the same household, self-isolate immediately, report it and book a confirmatory PCR test.** Self-isolation is vital to help limit the potential spread of the virus in your school/setting and wider community. Taking a PCR test is really important - PCR tests are more accurate than LFD tests, and can help identify whether the positive result is incorrect (a false positive). If the PCR test is negative, in most cases your household and your contacts will be able to end self-isolation subject to further advice from Test and Protect; and
- **they report any faulty test kits, to help us ensure the testing programme remains safe and effective.** Individual users can do so by calling 119 or by using the MHRA Yellow Card reporting system if there have been adverse incidents as a result of problems with test kits. Schools and local authorities can do so by calling the **NSS Helpline** on **0800 028 2816** or emailing **[nss.Covid19TestingSupport@nhs.scot](mailto:nss.Covid19TestingSupport@nhs.scot)**

There is support available to households who have to self-isolate and who need help. This includes the Self-Isolation Support Grant which provides £500 to those who earn less than the real living wage and have to self-isolate. Practical support is also available, including food or essential medicine deliveries, through the local self-isolation assistance service. You can either contact your local authority directly or contact the Coronavirus National Assistance helpline – available at 0800 111 4000, Monday to Friday 9am to 5pm, to find out more.

Schools should also still be maintaining their remote learning offers for students who have to self-isolate, to ensure as little disruption to their learning as possible.
